EXPERIENCE

Software Engineer (Freelance)

June 2021 - Present

QA Limited

- Architected and deployed production applications end-to-end, owning development from initial requirements through deployment and maintenance.
- Developed custom web applications and lead generation systems for clients, integrating payments, CRM workflows and automated email delivery.
- Built browser extensions, internal tooling and automation workflows that streamlined operational processes and reduced manual workloads.
- Engineered authentication, verification and community management systems supporting large online communities and digital products.

Full Stack Software Engineer

Sep 2024 - July 2025

Rampage Proxies

- Contributed to a platform generating \$1.1M in annual revenue by engineering and deploying a new customer dashboard and backend services that securely handled thousands of daily transactions.
- Delivered a Black Friday campaign page and dynamic discount system in React/Next.js, increasing promotional visibility and user engagement during peak seasonal traffic.
- Engineered and optimized RESTful API routes leveraging Fastify and Prisma to securely retrieve and manage data, ensuring efficient transactions and reliable data flow for thousands of daily users.
- Designed and implemented scalable features based on business requirements, ensuring maintainable architecture and test coverage to support future growth.

PROJECTS

Creator & Business Monetisation Platform | Next.js, Fastify, PostgreSQL, Redis, BullMQ, Prisma, Docker, Cloudflare, Stripe

May 2025 - Present

- Built a creator monetisation platform that attracted over 4.14M active visitors in its first year, generating 7.23M sessions and 16.1M page views.
- Designed scalable backend systems using PostgreSQL, Redis and BullMQ for analytics, caching, background jobs and platform automation.
- Deployed and maintained self-hosted infrastructure using Docker, Nginx, Cloudflare and DigitalOcean, supporting high-traffic production workloads.
- Developed creator dashboards, affiliate systems, monetisation features and analytics tooling supporting large-scale platform growth.

FNDRS | Next.js, TypeScript, PostgreSQL, Stripe, OAuth

July 2025 - Present

- Built a founder-focused platform providing gated content, resource libraries and subscription-based community experiences.
- Implemented authentication, payment processing and access-control systems enabling premium content access.

EDUCATION

Manchester Metropolitan University

Aug 2021 - May 2024

Bachelor Of Science (1st Class Honours) In Computer Science

SKILLS

Languages & Frameworks: TypeScript, JavaScript, Python, SQL, React, Next.js, Node.js, Fastify, Prisma

Infrastructure & Data: PostgreSQL, Redis, BullMQ, Docker, Nginx, Cloudflare, DigitalOcean, Linux

Authentication, Payments & Tools: OAuth, NextAuth, Stripe, Git
